Geotiles is committed to social responsibility, that is why we work with 32 foundations and occupational centers dedicated to the socio-labor integration of people with intellectual disabilities.

With the acquisition of this products, this social project that we develop with different non-profit organizations in the Valencian Community contributes to the growth. The objective of this collaboration is the social integration of the disabled people, promoting the values of self-improvement, effort and work that allow them to face new personal challenges and demonstrate their abilities day by day.

Desde Geotiles apostamos por la responsabilidad social, por ello trabajamos con 32 fundaciones y centros ocupacionales dedicados a la integración socio-laboral de personas con discapacidad intelectual.

Con la adquisición de estos productos, se contribuye al crecimiento este proyecto social que desarrollamos con diferentes organizaciones sin ánimo de lucro de la Comunidad Valenciana. El objetivo de esta colaboración es la integración social de los discapacitados, fomentando los valores de superación, esfuerzo y trabajo que les permiten afrontar nuevos retos personales y demostrar sus capacidades día a día.

TECHNICAL SOLUTIONS SOLUCIONES TÉCNICAS

Adhesion, understood as the strength of the bond between the ceramic piece and the base, plays a vital role in the quality of the tiled surface. Good adhesion should guarantee that the tile is firmly fixed to the base. The development of new low porosity ceramic materials that are resistant to abrasion and sub-zero temperatures, large formats, and their installation in industrial or large commercial areas, facades, etc., has led to a corresponding development in adhesive products.

Increased knowledge about the use of special adhesives means that thick layer installation (mechanical adhesion) is being replaced by thin layer installation (chemical adhesion); the latter offers clear advantages, particularly in relation to quality of both adhesion and durability. The appropriate adhesive must be chosen, taking into account the surface to be tiled and the type of ceramic tile.

It is very important to use the right tools when laying the tiles (notched trowel, white rubber mallet, spirit level and suction cup). The substrate on which the tiles are to be laid must also be free of any plaster, paint residues etc., thus enabling the adhesive to be effective over time.

The adhesive manufacturer's instructions must be followed at all times.

La adherencia, considerada como la fuerza de unión entre la pieza cerámica y el soporte, juega un papel importantísimo en la calidad de la baldosa cerámica. Una buena adherencia debe asegurar una firme sujeción de las piezas al soporte. La evolución de nuevos materiales cerámicos con baja porosidad, resistencia a la abrasión, al hielo, grandes formatos, así como el montaje o instalación de los mismos en industrias, grandes áreas comerciales, fachadas, etc., hacen que se desarrollen productos adhesivos.

El conocimiento adquirido acerca del uso de adhesivos especiales, hacen que el proceso de colocación en capa gruesa (adherencia mecánica) sea sustituido por un sistema de colocación con capa fina (adherencia química) que ofrece claras ventajas, especialmente relacionadas con la calidad de la obra, tanto en lo que se refiere a la adherencia como a la durabilidad. Por lo que se escogerá un adecuado adhesivo en función de la superficie de colocación y el tipo de baldosa cerámica.

Es muy importante que en la colocación de la baldosa cerámica se utilicen las herramientas y útiles adecuados (llana dentada, maza de goma blanca, nivel de burbuja y ventosa). También debemos considerar importante que el soporte o base de colocación debe estar muy limpio de cualquier mancha resto de yeso, pintura etc. de forma que la adherencia podrá realizar sus funciones a lo largo del tiempo.

Deben considerar siempre las indicaciones del fabricante de adhesivos.

This manual is designed to improve the quality and maintenance of the installed ceramic tile by offering recommendations from professionals in the sector.

The user may follow all the recommendations given in the manual, or those relevant to the task in hand.

Both recommendations to follow and practices to be avoided are given.

Over the years, Geotiles has achieved sustainable growth in the competitive ceramic tile market. Our presence is now firmly established in the most important distribution channels across the globe, affirming the hallmarks of Geotiles' identity: quality, design and innovation.

Fomentar la calidad del producto ya instalado y su mantenimiento es el motivo por el cual ponemos a su disposición este manual con recomendaciones elaboradas por profesionales.

En consecuencia, usted puede considerarlas en todo o en parte, teniendo en cuenta no sólo lo que éste le recomienda, sino también lo que debe evitarse. Geotiles ha logrado crecer sosteniblemente a través de los años en el competitivo mercado de la baldosa cerámica. Contando con una presencia estable en los principales canales de distribución de todo el mundo, con lo que calidad, diseño e innovación son las principales señas de identidad de Geotiles.
